

# PHOTOGRAPHY 20/30 PHOTOGRAPHY RULES

Each student is to research the given photography rule. Students are to explain the rule in 'real world english' (as if you are explaining to a person who has very little photography knowledge). Students are to have an example of the rule, which they can get from the internet. Finally each student is to create 3 'quality images' that follow the given rule. I have included the format in which I need the students to follow.
